

Minh Ly

Lewisville, TX | (510) 589-4608 | mly@udallas.edu

Skills and Interests

- Languages:** Advanced proficiency: Java, Python, Groovy, Javascript, Compose, NextAxiom
 Intermediate proficiency: C/C++, C#, Swift, Bash, Cadence, SQL, React/Typescript, PHP
 Novice proficiency: MATLAB, GML, R, Lua
- Interests:** Mobile Applications, Cyber Security, Machine-learning, AI

Education

University of Dallas

Irving, Texas

M.S. Cybersecurity

June 2020 - May 2021

- Cumulative GPA: 4.00
- Relevant Coursework: Data Protection, Network Security, Operational Cybersecurity Management, Penetration Testing and Vulnerability Assessment, Digital Forensics

B.S. Computer Science

Aug 2016 - May 2020

- Cumulative GPA: 3.65
- Relevant Coursework: Discrete Structures, Advanced Discrete Structures, Compiler Design and Construction, Networks/Databases/Cryptography, Machine Learning/Computer Vision, Mobile App Development

Work Experience

Paycom Payroll, LLC.

Irving, Texas

Software Developer

Jun 2025 - Feb 2026

- Debug and maintain core Customer Relationship Management (CRM) features, primarily working with PHP codebases using PHPStorm.
- Diagnose and resolve complex issues by optimizing SQL queries, improving system reliability and performance.
- Implement Quality Assurance tests to validate functionality and prevent regressions across critical workflows.
- Collaborate with cross-functional teams to investigate production issues and ensure timely delivery of fixes.
- Handle sensitive client data in accordance with company security and compliance standards.

Trinoor LLC.

Marietta, Georgia

Software Developer

Dec 2021 - Feb 2025

- Fixed bugs related to Hitachi's Enterprise Asset Suite Management using Compose and Next Axiom, improving software stability/reliability
- Worked on fixing Subapps for TASHelix software, enhancing user experience
- Development of TASHelix React build for Android

WildChain

Irving, Texas

Software Developer

May 2021 - April 2022

- Developing NFT marketplace/website for WildChain
- Writing contracts using the Cadence language that can interact with the Flow blockchain
- Building a prototype site for testing contract functions using React JS

Minh Ly

Lewisville, TX | (510) 589-4608 | mly@udallas.edu

University of Dallas

Research Assistant

Irving, Texas

Jun 2019 - Aug 2019

- Researched Barnette's Conjecture, an unsolved problem in Graph Theory involving Hamiltonian cycles
- Developed VR program using Unity to explore graphs for assistance in proving Barnette's Conjecture
- Designed system for importing and visualizing XML graph data
- Tested and implemented five variations of Force-directed graph drawing algorithms

Teaching Assistant

Sept 2017 - May 2018

- Designed and evaluated Mimir assignments weekly for a class of twenty students
- Wrote Bash scripts to grade student assignments
- Weekly tutoring for students learning to use the Racket programming language

Selected Independent Projects

YTSheets

May 2020

- Generated sheet music from YouTube piano tutorials by training a neural network
- Written in Python with heavy usage of the TensorFlow library
- Designed system for quick labeling/marketing of image data to be used for training

8-Bit DBZ

December 2019

- Application made for the iOS written in Swift
- Small platformer made using sprites from the franchise *Dragon Ball Z*
- Implemented physics for collision/contact between objects

Pokemon Ranger Battle

December 2017

- Recreation of the battling mechanics of the *Pokemon Ranger* series for the Nintendo DS system
- Written in Java and made use of computational geometry in finding when paths close and when those closed paths contain objects within them
- Developed functions for sprite animations and visualization of mouse movement paths
